Announcing Increased Backhaul Speed

Arizona City, AZ March 28, 2007: Today, AZCI.net, the premier provider of High Speed Internet Service in Pinal County, AZ, announces that backhaul speed to three of its subnetworks has been increased to 20 megabits per second. Customers whose IP addresses begin with 10.4, 10.5 and 10.10 are affected.

The faster backhaul circuits eliminate any possibility of congestion on AZCI.net's network on those subnets and bring those subnets to the same speed as the rest of AZCI.net's backhauls.

Over the next few months, AZCI.net will be increasing available bandwidth throughout its networks.

For more information about AZCI.net products and service plans, point your browser to <http://www.azci.net>.
